

DISINFECT — CLEAN — DESCALE

Introducing **BARRICLEAN**

The ideal and economic solution for thorough cleaning, sterilising and de-scaling oak barrels and vats.

Classic Oak Products introduce the latest technology designed to increase the life of your barrels and vats, economically and with environmental efficiency.

Model CD18i

Stainless Steel (steam flow 18kg/hour)

Specifications

Height: 100 cm
Width: 65 cm
Thickness: 50cm
Weight: 45 kg
Electrical energy: 20 AMP
380/400 volts (3 phases + hearth)
Flow rate: 18kg / hour of steam)

The most efficient model, best suited and most used for barrels (capacity of around 50 barrels per day or other applications).

Delivered with Ø 32mm stainless steel spike and two meter flexible steam pipe.

All **BARRICLEAN** are equipped with a digital timer with buzzer adjustable from 1 second to 10 hours with automatic disconnection of the steam flow at the end of each cycle.

BARRICLEAN generates a steam flow of 18kg/hour.

BARRICLEAN is renowned for its ability to dissolve tartrate deposits and assist in Brettanomyces reduction and VA reduction.

BARRICLEAN has a 12 month Warranty on all parts and labour.
